

How to switch Fixed USB Key To Removable USB Key

1 AKZO BACKUPONSTICK

Akzo BackupOnStick was designed to perform backup on removable USB key and on network drive.

Some of the USB key can be recognized as fixed drive. In that case, Akzo BackupOnStick won't allow using this drive as backup media.

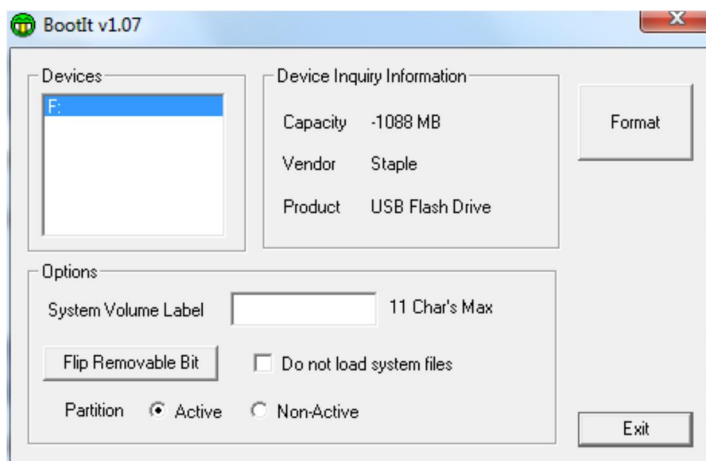

2 LEXAR FORMAT TOOL (LEXAR BOOTIT)

Lexar Format Tool (also called Lexar Bootit) is a utility that help format USB drive. This utility can also switch fixed USB drive to removable USB drive.

Warning: You do not need to format your USB drive. If you click on "Format", you will lose any data on the USB drive. Using "Flip Removable Bit" button is safe so you should not lose any data.

Follow this process to switch fixed drive to removable drive:

- 1) Connect the USB key to your computer.
- 2) Run bootit

- 3) Click on "Flip Removable Bit"
- 4) Click on "Ok" and re-insert the USB key.
